Subject : Granting 5 scores for the winning team who kicks 5 or more goals in a game

- It is hereby suggested that :

1. 5 scores, instead of 3 scores be given to the winning team who kicks fire or more goals, in high

score games.

2. In case that the loosing team can compensate the goals, change the result and win the game after

the 5th goal, 6 scores be given to the winning team.

3. Seven scores be given to the team who wins a game with 10 or more goals.

4. In case tat a competition results in equal and each team kicks five or more goals, 1.5 scores be

given to each team and if each team kick, 10 or more goals 2.5 scores be given to them.

5. In order to reduce the rate of violence in contests and promotion of fair and generous game

especially in World Cup, 0.5 scores be given to a team with no yellow card, 1 scores to a team

with no error in each game (2 scores in total : 0.5 scores for the lack of error, 0.5 scores for the

lack of yellow card and 1 score for the lack of red card).

In this way, teams plan for an aggressive and high score game, especially in leagues in which the teams try to achieve more scores.

The result, will be a high-speed, beautiful, high score and exciting football game.

Thanks very much for your sincere consideration in advance.

Sincerely,
